If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>	
	10/081,182	KOSHIMIZU ET AL.	
	<b>Examiner</b> Stephen M. Brinich	<b>Art Unit</b> 2625	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

1)  Responsive to communication(s) filed on 11 October 2006.  
2a)  This action is FINAL. 2b)  This action is non-final.  
3)  Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **Disposition of Claims**

4)  Claim(s) 1-11 is/are pending in the application.  
4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.  
5)  Claim(s) \_\_\_\_\_ is/are allowed.  
6)  Claim(s) 1-3 and 7-9 is/are rejected.  
7)  Claim(s) 4-6, 10 and 11 is/are objected to.  
8)  Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

9)  The specification is objected to by the Examiner.

10)  The drawing(s) filed on \_\_\_\_\_ is/are: a)  accepted or b)  objected to by the Examiner.

    Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

    Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11)  The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

12)  Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a)  All    b)  Some \* c)  None of:

1.  Certified copies of the priority documents have been received.
2.  Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3.  Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

1)  Notice of References Cited (PTO-892) 4)  Interview Summary (PTO-413)  
2)  Notice of Draftsperson's Patent Drawing Review (PTO-948) Paper No(s)/Mail Date. \_\_\_\_ .  
3)  Information Disclosure Statement(s) (PTO/SB/08)  
Paper No(s)/Mail Date 4/4/02, 10/11/06.  
5)  Notice of Informal Patent Application  
6)  Other: \_\_\_\_ .

**DETAILED ACTION**

**Claim Rejections - 35 USC § 102**

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-3 & 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Thirant (US 4240712).

Re claims 1-2 & 7, Thirant discloses (Abstract; column 1, lines 10-14; column 2, lines 34-38; column 5, lines 60-68; column 6, line 59 - column 7, line 16) an optical write image display screen which is switched between two modes, one of which is a transparent (light transmission image writing) mode and the other of which is a scattering (light dispersion image display) mode. Specifically, a thin layer (1) is switched by a role switch section (generator 410 and electrodes 40 & 41) in order to alter its optical characteristics between transparent and scattering mode. Insofar as any layer through which light must pass inherently dims it to some degree, this layer is readable on the recited (and not further specified except insofar as the previously described limitations pertain to it) "dimmer layer".

Re claims 3 & 8-9, Thirant further discloses (column 7, lines 53-61) that one image may be erased and another (necessarily different in optical characteristics and display mode in order to be perceived as different images) written in

its place. Particularly re claim 3, such an erasure of one image and writing of another necessarily includes a mode transition in both directions (i.e. the mode transition is necessarily reversible).

***Allowable Subject Matter***

3. Claims 4-6 & 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter:

Re claims 4-5, the art of record does not teach or suggest the recited dimmer layer in conjunction with the recited two-mode optical write image display screen.

Re claim 6, the art of record does not teach or suggest the recited position and attitude adjustment in conjunction with the recited two-mode optical write image display screen.

Re claim 10, the art of record does not teach or suggest the recited access-responsive communication arrangement in conjunction with the recited two-mode optical write image display screen.

Re claim 11, the art of record does not teach or suggest the recited arrangement of multiple independently controlled

areas in conjunction with the recited two-mode optical write image display screen.

***Response to Arguments***

5. Applicant's arguments filed 10/11/06 have been fully considered but they are not persuasive.

Applicant argues (10/11/06 Remarks: page 5, line 11 - page 6, line 6) that the Thirant teaches the switching of a display screen between transparent and scattering modes (by varying long molecule orientation), but does not teach the switching of a dimmer layer between light transmission and light dispersion modes.

As noted above, insofar as any layer through which light must pass inherently dims it to some degree, the thin layer of Thirant is readable on the recited "dimmer layer", insofar as it corresponds to the above described limitations of having the recited light transmission (transparent) and light dispersion (scattering) modes.

Applicant argues (10/11/06 Remarks: page 6, lines 7-9) that claim 11 is allowable for at least its dependence on claim 1.

Applicant's arguments re claim 1 have been addressed above.

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS

**ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning the contents of this communication or earlier communications from the examiner should be directed to Stephen M. Brinich at 571-272-7430.

Any inquiry relating to the status of this application or proceeding or any inquiry of a general nature concerning application processing should be directed to the Tech Center 2600 Customer Service center at 571-272-2600 or to the USPTO Contact Center at 800-786-9199 or 571-272-1000.

Application/Control Number: 10/081,182  
Art Unit: 2625

Page 6

The examiner can normally be reached on weekdays 8:00-5:30,  
alternate Fridays off.

The examiner's unit designation has been changed from "Art  
Unit 2624" to "Technology Division 2625" (as of March 20, 2006).

If attempts to contact the examiner and the Customer  
Service Center are unsuccessful, supervisor David Moore can be  
contacted at 571-272-7437.

Faxes pertaining to this application should be directed to  
the Tech Center 2600 official fax number, which is 571-273-8300  
(as of July 15, 2005).

Hand-carried correspondence may be delivered to the  
Customer Service Window, located at the Randolph Building, 401  
Dulany Street, Alexandria, VA 22314.
